

Page 26, following line 17: change "FAP enzyme activity" to -- FAP α enzyme activity --

IN THE CLAIMS

Amend claims 5 and 19 as follows:

Claim 5 (amended). Isolated protein consisting of:

- (i) the FAP α catalytic domain, and
- (ii) at least one portion of a non FAP α protein which consists of an amino acid

sequence not found in a FAP α molecule.

~~Claim 16, line 1:~~ after "FAP" add -- α --

Claim 17 (amended). The isolated protein of claim 5, wherein said [at least one portion of a] non FAP α protein is an extracellular domain of a CD8 protein.

~~Claim 19, line 1:~~ change "fuse in" to -- fusion --

REMARKS

Claims 5 and 16-19 remain in the application.

The examiner states that the application presents amendments for subject matter not disclosed in the original application. Applicants have reviewed the examiner's position carefully, and traverse.

The change to page 11, lines 23-24 is in accordance with changes made in the parent, and the grandparent application. As this is a divisional application, the specification text must be identical to the parent. Note that the changes were agreed to by the examiners in the preceding applications. It is believed that, in view of this, the examiner's position on the changes at page 11, lines 23-24 cannot be maintained.

Turning to the objection to "FAP enzyme activity," applicants have added " α " which is believed to address the issue.
